Alexandria, VA 22313-1450

INTERVIEW SUMMARY

I. INTRODUCTION

This is in response to the Interview Summary mailed October 29, 2004 in regard to the above-identified patent application.

II. REMARKS

On or about October 15, 2004, Applicant's Attorney, Ralph Gelling, called the Examiner to raise two issues:

1. The amendments submitted after final rejection were for the purpose of overcoming the rejections by the examiner based on 35USC112 and that these amendments properly placed the claims in better condition for appeal. Applicant submitted that no change in the scope of the claims occurred and no further search was required. The Examiner would not reconsider her refusal to enter the amendment.

2. Applicant maintained that the issue in the case is now focused on the difference between "code rate" and "data rate". Applicant indicated that this difference is substantial and known by those skilled in the art. The Examiner would not reconsider her final rejection.

The status of the application after the telephone interview, therefore, remained unchanged as no agreement was reached.

Respectfully submitted,

Geza C. Ziegler, Jr.
